Message: Re: Patent application 08/924,497, Art Unit 2876

Attached please find project of amendment in connection with personal interview at 12/28/98 reflected in interview summary and following telephone advices of Examiner.

As was agreed with Examiner during the interview in the amended application is left only one independent claim with text identical to agreed corrected now former claim 55 with recitation of movement of grid, and as was finally agreed with Examiner by telephone at January 5, 1999 this independent claim has been made as new with No. 61. In comparison with fax of at January 4, 1999 applicant made small improvement of agreed claim 55: is taken off word "focused" in first line and returned to previous agreed text because focusing repeats by following text of this claim.

Applicant believes Examiner will approve this change.

Also as was agreed are inserted in remarks the detail calculations with amount of blocking of primary radiation by moving of grid during the x-ray exposure procedure.

Applicant will appreciate with advices of Examiner for sending now whole text of amendment application with agreed independent claims and remarks, and newly inserted dependent claims and planes after review of Examiner to file the correct amendment.

Applicant again thanks very much to Examiner for his attention during the personal interview and following telephone conversations and will call to Examiner at January 12, 99, Tuesday after 10 a.m. as was agreed.

This fax is sending to two fax numbers in reason with problems of receiving.

Sincerely yours,
Oleg Sokolov
